

We'll never decay

As the time was going by
Where were we going
Heading towards darkness
Near the edge
Ready to jump
Into the black
Without turning back
But there were new ways to be
Discovered, new things to be revealed
We found our determination
And we know, we won't die, we won't die

We'll never decay
Our ties can't be broken
We'll never fall, you know
And you know, we won't die, we won't die

Now that all the clouds are gone
Our minds are free
To create new worlds
Using the new strength
That we have just found
Like a fire, burning hot
Here's our fire for you
To quench your thirst, to purify
The perfect solution
And you know, we won't die, we won't die
